

Application	ChreosClient – Chreos 3
Module	Tools
Access	“Tools Custom messages”
Minimum service pack	SP26
This document	Custom Messages Ref 10.3 Published May 2004

Overview

“Custom messages” allows you to customise messages that can be sent instantly by pressing the F11 and F12 ‘hot keys’ to all users who are currently logged into any instance of Chreos.

Details Displayed

- **F11 Message.** The customised message for the F11 ‘hot key.’
- **F12 Message.** The customised message for the F12 ‘hot key.’

To Change the Customised Message

- Enter the required message.
- Click the [Save] button.

To Send a Customised Message

- Press the <F11> or <F12> key and the customised message will automatically be sent to all users who are currently logged into any instance of Chreos.

When a Message is Received

When a message is received the ‘Chreos communications’ screen will appear over the top of the screen that is currently open in Chreos. It will display the following information:

- **Message From.** The user who sent the message.
- **Terminal.** The computer that the message was sent from.
- **To.** Who the message was intended for.

- **Message.** The message text.
- Click the [OK] button once the message has been read the.
- **Note:** The message will only appear in Chreos, if Chreos is open but another application is currently being used the message will be displayed in Chreos and therefore viewed when Chreos is next used. If Chreos is not running on a machine then the message will not display.

This information sheet is a support document related to the use of Chreos 3 from Wild Software Ltd only.
