

## CURRENT REGION

---

<b>Application</b>	Chreos Client
<b>Module</b>	Stock
<b>Access</b>	“Stock   Adjust Stock   Stock Min Max Levels Current Region”
<b>Minimum service pack</b>	SP45
<b>This document</b>	Stock Min Max Levels Current Region Ref 5.33 Published August 2009

---

### Overview

The minimum stock level and maximum stock level values are used as an indication at the time of ordering of when to order more stock and how much stock a region should have on the shelf. This screen allows minimum and maximum stock levels for all stock items or a particular subset of items in the current region to be altered at the same time rather than on an item by item basis through “Stock | Stock management”.

---

### Details Displayed

- **Item code.** The code of the stock item.
- **Name.** The name of the stock item.
- **Min.** The minimum quantity of the item that should be in stock at any time.
- **Max.** The maximum quantity of the item that should be in stock at any time.
- **Search ItemRef/Code.** The item search facilities. The item if found will become a Selected item.
- **Filtering.** This allows filtering of the items displayed in the grid by Type, Category, Location, Make, Maker or Supplier. A sub group can also be selected if appropriate. Click the [Apply] button to have the filtered selection of items appear in the grid. Click the [Clear] button to default back to all stock items.

---

## To Set the Min Max Levels

- Enter any new min and max levels . Changes are actioned immediately the quantity is altered
